**HYAZ™ Inkjet Media**

**Inkjet Backlit Film**

Item #	ABL-10
Media	Back-Lit Film
Media Type	Inkjet
Color	White/ Transparent
Printers	All Inkjet Desk Top Printers
Type of Adhesive	Removable

**Printing and Application Instructions**

- 1) Copy/Print on the coated side of the media using an Inkjet Printer.
- 2) Avoid using a high or the highest resolution when printing. This media may not be able to handle the excessive coverage. Start by using the coated film or transparency setting and regular resolution.
- 3) Print a mirror image. (Do this if you want the image to be viewed from the glossy side)
- 4) To prevent paper jams, make sure the media is not bent or warped or corners folded BEFORE loading. Load by hand ONE SHEET at a time to make sure it loads correctly.

**Note:** To judge the quality of the finished text or artwork hold the media up to a light source and view the results from the glossy side.

**THIS MEDIA IS FOR INDOOR USE ONLY!**

**If the label is used temporarily outdoors or in a location where the media/image may collect moisture you need to use a clear spray and an overlaminat**. The overlaminat must be cut larger than the label and then applied over the entire label to prevent water from contacting the label. Clear enamel spray is available in most hardware or automotive stores.

**For Car Windows** we strongly recommend using our UCF. The UCF (Ultra Cling Film) works in the same way as the static cling but it has a new generation of *micro spear coating* that clings to more types of substrates than static cling.

To extend UV resistant of Papilio inkjet media, HPS offers an overlaminat with UV barrier.
